Manufacturer	Lenovo
EAN	0883609474195
Manufacturer#	43R1990

Description

Improve productivity for selected ThinkCentre systems with the new ThinkCentre 500GB Serial ATA Hard Disk Drive. Its 300 MB/sec instantaneous data transfer rate is a 50% improvement over previous S-ATA technology. The drive features S.M.A.R.T., which can warn of predictable impending drive failure. S.M.A.R.T. is compatible with Rescue and Recovery software, a ThinkVantage technology available separately, which can perform unattended backup of customer data from the drive before failure. Drives predicting failure within the limited warranty period are eligible for warranty replacement. The drive assumes the warranty terms of the ThinkCentre system in which it is installed, making it potentially eligible for on-site service for up to three years.

Features & Benefits:

- Formatted capacity up to 500GB
- Slim one-inch high profile
- Rotational speed of 7200 rpm giving an average latency of 4.2 msec
- Average read seek time 8.5 msec
- 8 MB data buffer
